DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 3,4, drawn to angle sensor employing a cable.

Group II, claim(s) 7, drawn to angle sensor employ compressible fluid.

Group III, claim(s) 8, drawn to angle sensor employing incompressible fluid.

Group IV, claim(s) 9,10, drawn to angle sensor for a glove with fingers.

Group V, claim(s) 11,12, drawn to angle sensor for a wrist.

Group VI, claim(s) 13, drawn to angle sensors employ in series.

Claims 1,2,5 and 6 will be examined with any one of the elected groups above.

Please note that the terms "fibre" (claim 1) and "medium" (claim 2) have been interpreted to be a generic terms for either cable, compressible liquid or incompressible liquid.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group IV is directed to a "glove" employed sensor system, Group V is employed to a "wrist" employed sensor system, Group VI is employed with series connected sensors to apply an additive (see page 13 of specification) measurements, Group I is employs with a movable cable type sensor, Group II is employed with a compressible fluid type sensor, Group III is employed with a incompressible fluid sensor.

The six groups above necessarily takes into account that there are 9 possible embodiments (either a cable or compressible fluid or incompressible fluid type sensor, in combination with either a glove, wrist, or series-type measuring system).
